Rukh Kiri

Dear Sponsor,

Here is my personal report for you this year:

I am now 11 years old.

Currently, I am in primary school studying grade five.

World Vision is constantly monitoring my well-being. Currently I am in good health.

This year me and my family participated in and benefited from:

Health education

I learned how important it is to wash my hands so that I don't get sick.

Child rights education

I learned my rights and I feel like I have control over what happens to me.

Child protection awareness

I learned ways to prevent and report any child protection issues towards me, my friends or family members.

Child labour prevention workshop/training

I am more aware of the harmful effect of child labour.

There's more to tell...

Welcome to my community

In Rukh Kiri, most people are farmers, but when flash flooding affects harvests, many must seek work in Thailand.

Around 43,000 people live here, in a rural area 72 kilometres from the provincial capital. Health services are poor and far away. Diseases spread quickly due to the lack of clean water and toilets, as well as poor health and hygiene practices.

Many children miss school because their parents either can't afford it or don't understand the importance of education.

With your help, we'll continue to support children and families here, empowering them to give their children a better future, especially the most vulnerable.

Thank you from our staff & volunteers

"Thank you for your generous support as you change the lives of children. Our greatest achievement was providing hygiene training to 4,949 people, benefitting the health of many children and their families, and providing 391 more latrines in households.

"Despite our successes, we still face challenges, such as limited attendance at school. We are working with schools and the community to identify children most at risk and create a plan that addresses this. With your valuable contribution, we can continue to enhance child well-being here."

Soeur Sophally
Manager of Rukh Kiri Area Programme

Progress tracker

On average, we partner with a community for 15 years.

Cambodia vs Australia

Tropical

You're making a huge impact for children in Rukh Kiri

3,632

children can now access safe drinking water due to water sources installed in 10 primary schools.

254

adults were trained in chicken farming techniques and earned income to buy healthy food for their children.

227

children attended weekend reading camps to improve skills in reading, writing, drawing and telling stories.

562

children learned how to protect themselves from neglect, violence and abuse, and where to go for help.

"We used to bring boiled water with us to school because the rainwater tank was not healthy for us. With a new water treatment system, we now have clean, safe water at school."

Our stories of change

"Now, I have enough books, and money to pay for my classes..."

A few years ago, Reaksa felt ashamed that she didn't have school books, money or a bicycle to help her get to school.

Reaksa's father became a member of an agricultural cooperative and was trained in chicken farming. He began to raise chickens at home, selling chickens and eggs for income. Reaksa helps to feed the chickens before school and clean their water pots, and her parents have been able to buy a bicycle and school books from their new income.

"Now, I have enough books, and money to pay for my classes and eat snacks with my friends," says Reaksa, 12 years old (holding eggs). "In the future, I want to be a teacher."
